**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Smith et al. (#6,333,973).

The claims read on Smith as follows: Smith teaches (via reference to Abstract; figures 1, 2, 3, 6, 7A, 7B, 8A, 8B, 9A, 10, 12, col.2,ln.32-51; col.3,ln.48-67; col.5,ln.50-57; col.7,ln.50-56; col.8,ln.26-col.9,ln.23; col.9,ln.44-67; col.10,ln.27-30; col.12,ln.18-30) a system, method and computer program product for managing information including

recorded for messages, processor for origination identification data, display for record display, and selector for enabling selection of displayed record in desired manner via touch screen control to playback messages. Records are displayed as rows (lines across screen horizontally), a scroll control enables touching screen to scroll up and down the records, ports are provided for connection to incoming line as well as for connection to alternate communication device with suggestion of desktop PC for terminal. The records have plurality of fields including the indicia of time of occurrence, identity, recorded message, content. The rows are shown provided with columns via figure 7A-7B. Figure 8A shows the records with numerous indicia.

### *Conclusion*

3. The prior art made of record and not relied on is considered pertinent to the claimed subject matter.
